A CONSTANTLY CHANGING MARKET AND BOOM IN DEMAND ARE BRINGING NEW CHALLENGES AND OPPORTUNITIES TO AN INDUSTRY ON AN UPWARD TRAJECTORY.

PIVOT TO PROFIT
The estimated 18 million new gardeners who flooded the market last year continued to hit garden centers this spring, driving spring 2021 sales over spring 2020 sales for nearly three-quarters of IGCs that participated in this year’s State of the Industry survey. Despite the challenges of staffing, supply chain issues and the always unreliable spring weather, 95% of garden centers are expecting to turn a profit this year. The increasing customer base was the biggest positive factor for garden centers over the past year, followed by the economy but staffing, as always, was the biggest challenge, followed by availability of product.

Garden centers are not only dealing with product shortage, but increased shipping costs for the materials they are able to get. In fact, only 7% of IGCs indicated that they are not impacted by rising shipping costs and only 11% said they are not experiencing plant or product shortages. Plant shortages and shipping issues are likely bumping up the number of grower-retailers, which has been steadily rising over the past five years but jumped by 10 percentage points this year alone.

Read on to see how fellow garden center owners and operators are managing the challenges and opportunities of a constantly changing market. And be sure to visit gardencentermag.com/magazine for more survey results. — Kate Spirgen

SURVEY METHODOLOGY

We surveyed more than 300 independent garden center owners, operators and managers in the U.S. and Canada about their IGCs, their markets and trends in their areas. The following statistics were gathered via an online survey in October.

Editor’s note: Not all percentages will add up to 100% due to rounding and non-responses. Not all answer options are listed here.

2020 WAS FAR FROM BUSINESS AS USUAL, but thanks to quick adaptations, the garden center industry was just as robust last year as it was pre-COVID. For the most part, sales volumes in 2020 looked very similar to 2019 levels. This year, projected net profits returned to 2019 levels as garden centers got a better handle on how COVID would affect the industry. Those expecting profits of 10% or higher dropped more than 10 percentage points, but those expecting profits overall this year were about the same as last year. Increased demand and supply chain issues led more IGCs to raise plant prices this year, with 90% bumping up their price tags versus three-quarters last year. Despite the fact that spring sales skyrocketed last year, three-quarters of IGCs reported an increase in spring sales again this year. However, the increase looks a little smaller this year. Only 45% of garden centers saw a spring sale increase of 15% or more, versus 68% last year. But considering the unique situation consumers were in last year, and how much sales increased over 2019, those numbers are impressive.

### 2020 SALES VOLUME

- Less than $100,000: 10% (20%)
- $100,000-$499,999: 9% (20%)
- $500,000-$749,999: 9% (15%)

- More than $100: 6%

THE WEATHER

THE WEATHER HAS ALWAYS been a make it or break it factor for the majority of the time we’ve been conducting this survey. In the past, the vast majority of IGCs have indicated that weather had the biggest impact on their business out of factors like the economy, competition, staffing and marketing. But that’s not the case anymore. For the past two years, weather hasn’t had as much impact on business as factors like an increasing customer base and staffing challenges are more front of mind.

How has the weather impacted your garden center’s 2021 sales?

- Significant Negative Impact: -2
- No Impact: -2
- Significant Positive Impact: +2

-8% 17% 39% 26% 9%
STATE OF THE INDUSTRY

SUCCESSES AND CHALLENGES

What factor do you think is positively impacting your garden center’s 2021 sales the most?

- Increasing customer base: 33%
- Economy: 16%
- Quality of plant product: 11%
- Advertising/marketing: 10%
- COVID-19: 7%
- Staff: 7%
- Weather: 4%
- Improvements to online sales: 3%
- Low operation costs: 2%
- Technology advances: 2%
- None: 3%
- Other: 2%

What is your garden center’s greatest challenge?

- Staffing: 26%
- Availability of product: 15%
- High labor costs: 10%
- Supply chain delays: 9%
- Advertising/marketing: 8%
- COVID-19 protocols: 6%
- Competition: 5%
- High shipping costs: 4%
- Weather: 4%
- Decreasing customer base: 3%
- Keeping up with technology advances: 2%
- Quality of plant product: 2%
- Economy: 2%
- High operation costs: 1%
- None: 2%
- Other*: 2%

*Other responses include: limited space, parking and opening a new store

Complete Business Management Solution for:
Retail Garden Centers
Wholesale/Nursery
Landscape

The point of sale, inventory, and business management system that grows with you.

- Quick 1-step process to collect customer data
- Maintain horticulture database with images
- eCommerce integration
- Marketing tools for email and texting campaigns
- Unlimited reports for sales and buying trends
- Daily weather tracking with sales history comparison
- Built-in loyalty programs and gift cards
- Track inventory in real-time for multiple locations
- Mobile solutions for sales and inventory
- Process in-store, pickup, and delivery sales
- Text alerts for store, operations and fraud controls
- OFFLINE functionality ensures near 100% uptime

Shipping costs have been increasing quickly since autumn of 2020 and experts don’t expect them to come back down until 2022 or 2023. A shortage of truck drivers, huge increases in shipping container costs, port delays and gas prices have all contributed to increased costs and shipping delays. This year, we delved into how IGCs are dealing with the new challenges of COVID’s effects on the supply chain.

Which one area saw the biggest increase in sales at your garden center this spring compared with spring 2020?

- Houseplants, tropicals and succulents: 22%
- Annuals: 18%
- Trees/shrubs: 14%
- Vegetables and herbs: 10%
- Perennials: 8%
- Home decor/gift items: 4%
- Furniture: 4%
- Pottery/containers: 3%
- Hard goods (growing media, mulch, fertilizer, tools, etc.): 2%
- Fountains and statuary: 2%
- Birding/nature products: 1%
- Water gardening: 1%
- None: 6%
- Other: 2%

Which one area saw the biggest decrease in sales at your garden center this spring compared with spring 2020?

- None: 28%
- Vegetables and herbs: 9%
- Fairy/miniature gardening items: 9%
- Annuals: 9%
- Furniture: 6%
- Trees/shrubs: 6%
- Hard goods (growing media, mulch, fertilizer, tools, etc.): 5%
- Home décor/gift items: 5%
- Fountains and statuary: 4%
- Indoor houseplants/tropicals/succulents: 4%
- Perennials: 4%
- Apparel/accessories: 3%
- Pottery/containers: 3%
- Water gardening: 3%
- Birding/nature products: 2%

Supply Chain

Shipping costs have been increasing quickly since autumn of 2020 and experts don’t expect them to come back down until 2022 or 2023. A shortage of truck drivers, huge increases in shipping container costs, port delays and gas prices have all contributed to increased costs and shipping delays. This year, we delved into how IGCs are dealing with the new challenges of COVID’s effects on the supply chain.

How are you managing increased shipping costs? Please select all that apply.

- Increasing cost to customers: 65%
- Purchasing more product in fewer shipments: 37%
- Changing vendors: 23%
- Carrying alternatives: 23%
- We are not impacted by increased shipping costs: 7%

How are you handling plant and product shortages? Please select all that apply.

- Ordering in advance: 57%
- Changing product offerings: 42%
- Placing larger orders: 39%
- Replacing vendors: 28%
- We are not experiencing plant or product shortages: 11%
FACING INCREASED DEMAND, supply chain issues and plant shortages, many IGCs have increased their own growing capabilities over the past year. Not only did grower-retailers want control over their supply, they wanted control over the quality of their plants. The number of garden centers growing their own material grew nearly 10 percentage points over last year, and readers are also reporting increased diversity and volume of plant material in their greenhouses and nurseries as well.

It’s also important to note that the number of grower-retailers is steadily increasing. For six years, the number was a steady 62% on average, and before that, only half of our readers reported growing any of their own plant material.

Every single plant category saw an increase from 2020 to 2021, which we’ve never seen before. In particular, perennials saw a huge jump of nearly 20 percentage points. Succulents and indoor foliage plants are also increasing in popularity, jumping up more than 10 percentage points over last year. Edible plants saw a similar jump as increasing consumer demand drove more IGCs to grow their own. And growers aren’t just diversifying; they’re growing more quantity. In fact, only about a tenth of growers reported growing the same amount of material they grew last year.

Have you grown your own plant material?

- Yes: 72%
- No: 28%

What garden centers are growing:

- Perennials: 68%
- Vegetables/herbs: 58%
- Annuals/bedding color: 57%
- Succulents: 41%
- Indoor foliage plants: 40%
- Trees/shrubs: 35%
- Cut flowers: 13%

Have you increased the amount of plant material you grow in the past two years?

- Yes, increased volume: 29%
- Yes, increased diversity: 40%
- Yes, increased both volume and diversity: 18%
- No: 13%

Thanks to increased sales and booming profits, garden centers are seeing more working capital in recent years. More than half are planning to invest in their businesses in some way, and nearly half are planning to improve retail space or reward their hard-working staff. And thanks in part to increasing demand for online shops, a full quarter are planning to improve their online infrastructure.

Have you seen an increase in working capital in the last two years?

- Yes: 73%
- No: 27%

Do you plan to make a capital investment in your IGC in the next year?

- Yes: 64%
- No: 36%

How are you managing your working capital? Please select all that apply.

- Improving retail space: 45%
- Increasing pay, bonuses or incentives: 44%
- Saving it: 30%
- Improving growing operations: 28%
- Investing in online infrastructure: 25%
- Expanding retail space: 23%
- Expanding growing operations: 19%
- Hiring more staff: 18%
- Other*: 5%

*Other responses include: stockpiling inventory, purchasing new equipment, reducing debt and saving it due to plans to sell the business
Which of the following have you implemented at your IGC since the COVID-19 outbreak? Please select all that apply.

- Curbside pickup: 78%
- Phone ordering: 62%
- Online shopping: 45%
- Order delivery: 42%
- Online classes/workshops: 8%
- None: 13%
- Other*: 5%

*Other responses include: increased online advertising, appointments, take-home class kits and social distancing.

Which of the following have you implemented at your IGC in the last 18 months? Please select all that apply.

- Curbside pickup: 56%
- Online shopping: 45%
- Phone ordering: 37%
- Order delivery: 27%
- Online classes/workshops: 16%
- None of the above: 22%

Which of the following has been the most successful at your IGC in the last 18 months?

- Online shopping: 25%
- Curbside pickup: 17%
- Phone ordering: 9%
- Order delivery: 9%
- Online classes/workshops: 5%
- None of the above: 34%

How has staffing changed since the coronavirus outbreak?

- No staffing changes: 43%
- We have increased our staff: 16%
- We have temporarily decreased staff: 36%
- We have laid off staff: 5%

What are you doing to retain the new gardeners your IGC has seen in the past 18 months?

- Improving social media presence: 71%
- Implementing more informational signage: 45%
- Offering improved or additional plant care instructions: 43%
- Stocking more easy-care plants: 38%
- Offering beginner gardener education such as classes or webinars: 25%
- None of the above: 6%
- Other*: 5%

*Other responses include: offering online pre-shopping, initiating a customer appreciation program, improving email lists, improving staff listening skills, creating more interactive areas, putting in information booths and increasing product diversity.
THE HIRING MARKET IS TOUGH, with an increase in garden centers reporting that hiring is “very difficult” this year.

Minimum wages are increasing drastically, as companies struggle to find workers during the pandemic. Last year, only 15% of independent garden centers were paying $15 an hour or more, while this year, more than a quarter are offering a starting wage that high. The impact of increasing minimum wages is also a bigger factor in why garden centers are having trouble hiring, rising a full 10 percentage points this year over last.

However, the lack of available or qualified employees continues to be the biggest hindrance in hiring, as it has been since we started asking this question.

What is your minimum/starting wage for hourly employees?

<table>
